Azure Minerals' Tony Rovira Presents to Melbourne RIU Resources Round-Up

Mexican-focused **Azure Minerals Limited** ("Azure" or "Company") is pleased to provide a video link to Executive Chairman, Mr Tony Rovira's recent presentation at the RIU Melbourne Resources Round-Up Conference.

The presentation, titled "On Track to Mineral Production in Mexico", details why Mexico is a favoured mining destination, provides a Company and project overview and includes information on Azure's '*Pipeline to Production*' strategy.

To watch Mr Rovira's presentation, simply click through to the link supplied below:

Background of Azure Minerals Limited:

Azure Minerals is an Australian mineral exploration company focused on developing mining projects in the richly mineralised Sierra Madre Occidental mining province in northern and central Mexico. Azure's three key properties are the **EI Tecolote** copper-zinc project, the **San Francisco** manganese project, and the **Promontorio** copper-gold-silver project.

Exploration for porphyry copper and skarn copper-zinc deposits is underway on **EI Tecolote** in joint venture with Japanese Government corporation JOGMEC. EI Tecolote hosted an historical mining operation which produced 1.4Mt @ 1.9% copper, 7.0% zinc & 47g/t silver, and potential for similar deposits is present throughout the property. JOGMEC may earn a 70% interest in this project by expending US\$13 million.

San Francisco has a JORC Resource of 1.05Mt @ 30% Mn, and offers Azure a near term pathway to production. Resource expansion drilling and feasibility study activities are currently in progress.

Promontorio has a JORC Resource of 502,000 tonnes @ 4.7% Cu, 2.1g/t Au & 99g/t Ag. Metallurgical testwork produced excellent metal recoveries into a high grade copper-gold-silver concentrate, and economic evaluation shows Promontorio can be developed and operated profitably.
